DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Vander Veken.

There is disclosed in Vander Veken a brewing cartridge, comprising: an inlet (upper opening of vessel) for the introduction of liquid; an outlet (perforated bottom of element 4) for discharge of a beverage; an outer member 1a; and an inner member 4.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6, 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Piana in view of Knodt et al.

There is disclosed in Piana a beverage cartridge, comprising: an inlet 44; an outlet 28; an outer member 16; and an inner member 18, 22.

Knodt discloses a snap-fit arrangement between inner and outer members of a beverage cartridge.

It would have been obvious to one skilled in the art to construct the cartridge of Piana in separate pieces and provide a snap-fit arrangement for those pieces as taught by Knodt, in order to allow easy cleaning of the cartridge.

Allowable Subject Matter

Claims 7-18 are allowed.

Response to Arguments

Applicant's arguments filed 18 April 2006 have been fully considered but they are not persuasive. Applicants "snap-fit" arrangement fails to define any specific structural or operational arrangement. Without any defined structure the claimed limitation of a "snap-fit", and its interpreted meaning by the examiner, is met by the prior art references.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
